(54) Sampling bottle arrangement

(57) A sampling bottle (1) for fluid samples, e.g., oil, comprises a cylindrical container body (1') which can be fluid-tightly closed at the ends thereof by means of end pieces (2, 3) having valves. Internally, the sampling bottle is provided with an axially freely displaceable piston (6) and a mixing body (7). The mixing body (7) is constituted by a preferably cylindrical member having one or more through-going bores (7').
